RESPONSIBILITY AS A MAIN COMPETENCE

Abstract
This article aims to compare the responsibilities of managers and university students. This comparison is performed by formulating a hypothesis and subsequent authentication using the Wilcoxon test, where answers from both of the groups are compared. In conclusion, the article summarizes the results and possible improvements and development of students in scope of education at the university field. Paper is one of the solutions of grant research MEB061008 “Cross border enterprise – B2B marketing and distribution in Austria and Czech Republic”.
